Ramcon Reaches New Pinnacles Exceeding Expectations.

The 3rd Edition of the Reliability and Maintainability Conference and Exhibition RAMCon2022 kicked off on December 13th, 2022, with a bang, establishing itself as the Biggest Event in the oil and gas Industry.

The RAMCon2022 conference brought together experts in reliability and maintenance to talk about new technologies, long-term operational excellence, the future of the sector, and how to improve the planning and implementation process during shutdowns. The three-day conference and exhibition, which was held from **13-15 December 2022** at the **Address Hotel, Dubai Marina**, was centered on the problems currently being faced in petrochemical plants and refineries. It also discussed the use of new technologies and innovative ideas in the petrochemical industry.

Business leaders from the United Arab Emirates, Saudi Arabia, Bahrain, Oman, Qatar, and Europe attended RAMCon to discuss new trends and lessons in maintenance and reliability.

HIGHLIGHTS

Opening Speech:

Mr. Meshaal Al-Khaldi - UF&SD Head - Saudi Aramco delivered the Opening Speech, which was followed by awards and recognition for all incredible sponsors and exhibitors, including Prime Sponsor Saudi Aramco and Platinum Sponsors Al-Hajry Overseas and Arabian Fal.

KEYNOTES

In the opening keynote address, Dr. Raymond AlSalhani – General Manager – Al-HAjry Overseas emphasized the importance of repair and maintenance in order to reduce corrosion, increase safety and reliability, and lower long-term costs.

Mr. Kevin Mcquillen, Senior Advisor at Solomon Associates, delivered the second keynote address. Mr. Mcquillen shared valuable insights into the Refining industry's reliability and maintenance performance trends. He emphasized the significant changes over the last decade and how technological advancements help support records and gather more data about maintenance activity.
